The infographic is divided into two columns by a vertical line with a central blue circle containing the text "VS.". The left column is titled "Discussion" and features a speech bubble icon. The right column is titled "Conclusion" and features two crossed checkered flags. Below the "Discussion" title are five items, each with an icon and a text description. Below the "Conclusion" title are five items, each with an icon and a text description. At the bottom of the infographic, there is a promotional message and four social media/contact links.

Discussion	Conclusion
Interpret your results	Restate your hypothesis
Compare your results with those from previous studies	Restate your most important findings
Discuss the limitations of your results	Highlight limitations of your study
Highlight the unexpected results, if any	Highlight the overall significance of your study
Mention how your results add value to those from the previous studies	State future direction

A well-organized manuscript generally follows the IMRaD (Introduction, Methods, Results, and Discussion) format to convey the relevant information to the target audience. The concluding part of the manuscript is equally important. It helps readers to assess the implication as well as future direction of your research work. So how do you clearly organize your discussion and conclusions sections and what is the difference between the two?

To learn more the difference between the discussion and conclusion, [click here](#).

Discussion

-  Interpret your results
-  Compare your results with those from previous studies
-  Discuss the limitations of your results
-  Highlight the unexpected results, if any
-  Mention how your results add value to those from the previous studies

VS.

Conclusion

-  Restate your hypothesis
-  Restate your most important findings
-  Highlight limitations of your study
-  Highlight the overall significance of your study
-  State future direction
