How Can You Measure the Impact of Your Research?

H-index
An h-index of 40 means that a researcher has published at least 40 articles that have received at least 40 citations each.

H-index can also be calculated for institutes and countries!

G-index
A g-index of 30 means that a researcher has published at least 30 articles and when combined received at least 900 citations.

i10-index
An i10-index of 20 means that a researcher has 20 articles that have received at least 10 citations each.
